We are hiring! SecOps Engineer

You will be a member of the DevOps Engineering team and you will be responsible for the execution of the daily security operations, automating crucial security tasks, with the goal of developing more secure applications.

A day in this job

- You design high-availability applications and provide backend support & administration. IT-security, governance and service management (including SLA definition and monitoring) are especially crucial tasks;
- Of course, you are well-versed in the ABC of modern application support and development – process & deployment automation, monitoring and technical documentation, etc.;
- Configure and maintain security controls on our infrastructure;
- Reporting and remediation of security vulnerabilities and incidents;
- Perform vulnerability assessments using tools like Rapid7 InsightVM and InsightIDR;
- Provide expertise and best practices for implementing cloud security (internal) and product security (external);
  Work alongside the SRE team in order to build a secure architecture

OPEN to new graduates with knowledge in Security

Requirements

- Bachelor's or Master's degree in computer science or related field;
- Cloud based infrastructure experience withknowledge with AWS;
- Experience as application developer/owner/administrator of ITSM
- Experience in implementing IT Security & IT Risk controls (e.g. Security Monitoring, Alert Handling);
- Experience with deployment orchestration, automation, and security configuration management (Jenkins, Cloudformation, Terraform, Ansible) preferred;
- Strong experience with containerized environments (Docker);
- Knowledge of cloud-based security management/IDS/IPS/SIEM tools;
- Excited to work on interdisciplinary and international projects;
- Good command of English

What is in it for you?

- Join a multicultural team of around 400 employees coming from more than 40 different nationalities;
- Your ideas mean something, if you have a good idea we let you try it;
- No dress code plus a flat hierarchy;
- 20 days of paid leave, so long as you promise to come back!
- MacBook Pro for everyone.
