and Communication Technology

ICT MAHIDOL

Table of Contents

Welcome Message from the Dean

Congratulations and welcome to the ICT Mahidol family and your home for life!

ICT Mahidol is a place where you acquire cutting edge knowledge and wisdom in advanced computing technology, life-long learning and 21st century skills. We are living in a "New Normal" era and our living and learning styles have been disrupted and in many ways have been changed permanently. COVID-19, while having severe impact on the world population, accelerates innovative developments and deployments of computing applications and services around the globe. New tech millionaires and unicorn companies have been created from this pandemic. With your determination and fortitude, our faculty and staff will equip you with necessary knowledge and skills to do the same! You and IT people from every continent can help in crafting our new way of living, the "Next Normal". Besides your academic duty, you will also make many friendships that will last a lifetime! You will enjoy our campus and well-equipped ICT building with many exciting student activities. Living a good life is to have fun while doing the things that you like and to make life meaningful.
Our faculty members and supporting staff are eagerly looking forward to greeting and welcoming you in person on our beautiful campus and ICT Mahidol at Mahidol University. Can't wait to see y 'all. WE Mahidol!

About Mahidol University

Mahidol University was named after Prince Mahidol, present King's grandfather (the present king is Rama X), who founded the first Medical School in the country at Siriraj Hospital in 1890. It not only provided modern medical services for all people but also served as Thailand's first institution of higher education. Mahidol is one of the most prestigious universities in Thailand, and has been well recognized for its outstanding achievements in teaching, research and professional services.

The philosophy of Mahidol University is best summarized by the University motto: "**At-ta-nang Up-pa-mang Ka-re**" which can be translated to English: as '**Do unto others as you would have others do unto you**'. This philosophy is the underlying theme pervading in all activities of Mahidol as it endeavors to imbue graduates with the conviction that, apart from academic matters, they have responsibilities for improving the quality of life of human beings and making this world a better place to live in. In addition, the statement "True success is not in learning but in its application for the benefit of mankind." of His Royal Highness Prince Mahidol is our essential guiding light.

Mahidol University Core Values

Mastery

Altruism

Harmony

Integrity

Determination

Originality

Leadership
About Faculty of ICT

Established in 2009, The Faculty of Information and Communication Technology is one of the newest faculties of Mahidol University. It stems from the Department of Computer Science, Faculty of Science and the Computing Center, which have cooperatively worked together in the development of software for university administration, and in computing research since 1988. Recognizing the significance of information and communication technology development in Thailand, Mahidol University has established the ICT Faculty with the missions to develop a world class ICT academic and research environment that equips our learners, faculty, and staff with agility, flexibility, knowledge, and opportunities to pursue their professional and academic goals while contributing to the economic and cultural development of the nation and the world.

The Faculty of ICT offers six degrees:

1. Bachelor of Science in Information and Communication Technology (ICT) : International Program
2. Bachelor of Science in Digital Science and Technology (DST) :Thai Program
3. Master of Science in Computer Science : International Program
4. Master of Science in Cyber Security and Information Assurance : International Program
5. Master of Science in Game Technology and Gamification : International Program
6. Ph.D. in Computer Science : International Program

For ICT Program, we have eight major tracks: Multimedia Systems, Electronic Business Systems, Database and Intelligent Systems, Computer Science, Health Information Technology, Software Engineering, Computer Network and Management Information Systems. The total number of students for ICT Program is about 690 students and DST Program is about 88 students, while the number of students in the graduate level is about 88 students.

Currently, we have a total of 53 lecturers; 46 lecturers from the Computer Science Academic group and 7 lecturers from the Foreign Language group.

Vision	Missions
To provide superior academic and professional opportunities in digital computing education, research, and innovation responsive to the needs of a rapidly changing world, elevating the national and global digital economy.	To develop a world class ICT academic and research environment that equips our learners, faculty, and staff with agility, flexibility, knowledge, and opportunities to pursue their professional and academic goals while contributing to the economic and cultural development of the nation and the world.

Core Values: "ONE ICT: Go forward together as ONE"

Color symbolism of the Faculty

⬢ **Oceanic Green**: Blue + Green

- Blue is the color of Mahidol
- Green is the color of nature
- Oceanic Green is therefore like the ocean - the vastness home of the origins of all lives, ICT is the knowledge that is beneficial to all professions.

⬡ **Cream**: Yellow + White

- Yellow is the color of our beloved King.
- Moreover, yellow is also the color of the Faculty of Science which is also the origin of the Faculty of ICT.
- White is the color of morality.
- Cream is therefore the symbol of a firm development with morality and ethic.

Bachelor of Science in ICT

Program Title : Bachelor of Science Program in Information and Communication Technology (International Program)

Degree Title : Bachelor of Science in Information and Communication Technology

Abbreviated : B.Sc. (Information and Communication Technology)

Since 2003, the Bachelor of Science in ICT program is an exceptional international program that aims to produce highly qualified graduates in the areas of Computer Science, and ICT. The program consists of both rigorous fundamental and technical knowledge as well as the 21st Century Skills focusing on communication and teamwork skills which are vital for the students' future careers. The students are expected to be highly competitive at the international level, not only with their technical specialty, but with their English proficiency as well. The entire program is offered in English and all materials are in English.

Program Learning Outcome (PLOs)

PLO1: Effectively communicate the basic knowledge of computer science, mathematics, science, social science, humanities, healthy living, economic and finance with other people.

PLO2 : Use systematic approaches by critically thinking at multiple levels of abstraction and solving problems under the context in which a computer system (will) operates (ICT disciplinary skills).

PLO3 : Demonstrate abilities to study and work both independently and collaboratively.

PLO4 : Recognize the individual, social, and ethical responsibilities of a professional working in ICT-related disciplines.

PLO5 : Demonstrate effective command of the English language for professional communication.

SLO6 Use knowledge and skills in one or more of the selective tracks related to ICT career paths to a wide range of applications in real world. The selective tracks include Computer Science, Databases and Intelligent Systems, E-Business Systems, Multimedia Systems, Software Engineering, Health Information Technology, Computer Network, and Management Information Systems.

SLO7 Apply computer science knowledge and skills to scope, design, and implement ICT-based solutions to more open problems with the awareness of advanced technologies.

SLO8 Carry out research practices in ICT-based topics under a supervision of experienced researchers with the awareness of cutting-edge technologies

SLO9 Carry out professional practices and skills to learn and work beyond classroom.

Academic Calendar

The B.Sc. in ICT program is a 2-semester program. The calendar of the program is as follows:

First semester	First week of August – First week of December
Second semester	First week of January – First week of May
Summer break	Second week of May – End of July

Each semester consists of 16 weeks. Lectures are normally given for 15 weeks and the last week of the semester will be the final exam week.

Study Plan

In general, the program study plan is arranged as follows but can be changed from year-to-year depending on the technology trend.

1st year

The 1st semester

ITLG	101	Technical English I	2
SCBE	100	Wonder of Life	3
SHHU	116	Comparative Culture	2
ITCS	320	Discrete Structures	3
ITCS	175	Advanced Mathematics I for Computer Science	3
ITGE	101	Problem Solving Techniques	2
ITCS	201	Fundamentals of Programming	3

Total credits	18

The 2st semester

ITLG	201	Reading Skills	2
SHSS	103	Man and Society	2
SCGI	110	Chemistry in Everyday Life	3
ITCS	211	Introduction to Digital Systems	3
ITCS	161	Physical Science and Computation	3
ITCS	209	Object Oriented Programming	3
ITCS	125	Applied Statistics for Computing	3
ITGE	141	Digital Photography	1

Total credits	20

2nd year

The 1st semester

ITLG	102	Technical English II	2
ITCS	306	Numerical Method	3
ITCS	241	Database Management Systems	3
ITCS	222	Computer Organization and Architecture	3
ITCS	231	Data Structures and Algorithm Analysis	3
ITCS	159	Software Lab for Basic Scientific Problem Solving	1
ITID	xxx	Free Elective Course	2

Total credits	17

The 2st semester

ITLG	202	Public Speaking and Presentation	2
ITCS	323	Computer Data Communication	3
ITCS	381	Introduction to Multimedia Systems	3
ITCS	343	Principles of Operating Systems	3
ITCS	212	Web Programming	3
ITCS	335	Introduction to E-business Systems	3
ITGE	301	Communications Strategies in Professional Life	2

Total credits	19

3rd year

The 1st semester

ITLG	301	Business Writing	2
ITCS	371	Introduction to Software Engineering	3
ITCS	414	Information Storage and Retrieval	3
ITCS	420	Computer Networks	3
ITCS	451	Artificial Intelligence	3
ITCS	443	Parallel and Distributed Systems	3
ITCS	361	Management Information Systems	3

Total credits	20

The 2st semester

ITLG	302	Academic Writing	2
ITCS	424	Wireless and Mobile Computing	3
ITCS	461	Computer and Communication Security	3
ITCS	337	Human Computer Interaction	3
ITCS	391	Computer Network Lab	1
ITCS	xxx	Elective Course (Track)	3
ITCS	xxx	Elective Course (Track)	3

Total credits	18

			The 1st semester					The 2st semester	
4th year	ITCS	402	Computer and Business Ethics	3		ITCS	492	Senior Project II	3
	ITID	277	Digital Marketing	2		ITCS	xxx	Free elective course	
	ITCS	491	Senior Project I	6					
	ITCS	xxx	Elective Course (Track)	3					
	ITCS	xxx	Elective Course (Track)	3					
Total credits			**17**			**Total credits**		**3**	

Track / Major Courses

Database and Intelligent Systems		Computer Science	
ITCS 413 Database Design	3	ITCS 331 Organization of Programming Languages	3
ITCS 431 Software Design and Development	3	ITCS 413 Database Design	3
ITCS 452 Knowledge-Based Systems	3	ITCS 425 Algorithms	3
ITCS 453 Data Warehousing and Data Mining	3	ITCS 431 Software Design and Development	3
ITCS 455 Natural Language Processing	3	ITCS 440 Principles of Compiler Design	3
ITCS 456 Machine Learning and Intelligent Systems	3	ITCS 447 Embedded Systems and Applications	3
ITCS 457 Decision Support and Business Intelligent Systems	3	ITCS 453 Data Warehousing and Data Mining	3
ITCS 476 Digital Image Processing	3	ITCS 475 Mathematical Programming	3
ITCS 495 Special Topics in Databases and Intelligent Systems	3	ITCS 481 Computer Graphics	3
		ITCS 498 Special Topics in Computer Science	3

Software Engineering		Management Information Systems	
ITCS 379 Practical Software Engineering	3	ITCS 364 Knowledge Management	3
ITCS 431 Software Design and Development	3	ITCS 365 Information Systems Analysis and Design	3
ITCS 471 Software Requirement Analysis and Specification	3	ITCS 366 Enterprise Architecture	3
ITCS 472 Software Metrics	3	ITCS 367 IT Infrastructure Management	3
ITCS 473 Software Quality Assurance and Testing	3	ITCS 368 Information and Business Process Management	3
ITCS 490 Special Topics in Software Engineering	3	ITCS 439 E-Customer Relationship Management	3
		ITCS 453 Data Warehousing and Data Mining	3
		ITCS 457 Decision Support and Business Intelligent Systems	3
		ITCS 408 Special Topics in Management Information Systems	3

Computer Networks		Multimedia Systems	
ITCS 422 Local Area Networks	3	ITCS 481 Computer Graphics	3
ITCS 423 Telecommunication	3	ITCS 484 Computer Animation	3
ITCS 428 Network Programming	3	ITCS 485 Multimedia Information Systems	3
ITCS 429 Computer Forensics	3	ITCS 486 Multimedia Data Technologies	3
ITCS 465 Network Management	3	ITCS 487 Multimedia Authoring and Production	3
ITCS 493 Special Topics in Computer Networks	3	ITCS 488 Multimedia Development and Deployment	3
		ITCS 496 Special Topics in Multimedia Systems	3

Health Information Technology		Electronic Business Systems	
ITCS 403 Introduction to Healthcare Systems	3	ITCS 431 Software Design and Development	3
ITCS 404 Information Technology for Healthcare Services	3	ITCS 433 Production, Supply Chain and Logistics Management	3
ITCS 405 Information Models and Healthcare Information Standards	3	ITCS 435 Business Decision Analysis	3
ITCS 407 Practical Healthcare Management	3	ITCS 438 E-Business Modeling and Development	3
ITCS 409 Special Topics in Healthcare System	3	ITCS 439 E-Customer Relationship Management	3
ITCS 453 Data Warehousing and Data Mining	3	ITCS 453 Data Warehousing and Data Mining	3
		ITCS 457 Decision Support and Business Intelligent Systems	3
		ITCS 494 Special Topics in Electronic Business	3
		ITCS 431 Software Design and Development	3

Remark:

- Some courses have pre-requisites. Please check the Bachelor of Science in ICT program curriculum or study plan on the website of the Faculty of ICT for more details on pre-requisites. Receiving an **"F"** from a pre-requisite courses may result in graduation delays.

- Some track/major courses may cover more than one track.

The 93-credit Special Education courses are divided into

Core Courses 12 credits

Core courses provide basic level of knowledge as the base of higher level courses.

Compulsory Courses 69 credits

Compulsory courses give significant background in ICT areas.

Track/Major Courses 12 credits

Graduation Requirements

In order to graduate from the Faculty of ICT, a student has to complete 129 credits comprising of 30 credits for General Education, 93 credits for Special Education, and 6 credits for Free Elective courses with cumulative grade point average (CGPA) at least 2.0, Complete "ITCS 201: Fundamentals of Programming" with grade evaluation at least "C", Complete "ITLG 202: Public Speaking and Presentation" with grade evaluation at least "C",

Complete "ITLG 302: Academic Writing" with grade evaluation at least "C" and "pass" one of the following English Proficiency Test as follows:

IELTS (International English Language Testing System)

5.5

TOEIC (Test of English for International Communication)

620

TOEFL (Test of English as a Foreign Language)

525 (Paper-Based)

196 (Computer-Based)

70 (Internet-Based)

MUELT (Mahidol University English Language Test)

89

The Duolingo English Test

90

Major Tracks

Track/Major courses focus on in-depth knowledge in ICT major tracks currently consisting of the following tracks.

Computer Science (CS)

This core track focuses on the use of several computer science theories to solve fundamental problems. In addition, students will study system related topics in computer science such as algorithms analysis, database design, embedded system, and computer graphics.

Databases and Intelligent Systems (DB)

This core track focuses on creating, extending, and applying database and artificial intelligence technologies to real world problems. Students in this major will learn the theory of database design, data warehousing and data mining, digital image processing, intelligent techniques for pattern recognition, semantic web, knowledge management, and advanced database technologies and applications.

Software Engineering (SE)

This core track focuses on a systematic approach to the development process, analysis, design, implementation, testing, maintenance, and quality assurance of software. Students will learn the fundamentals of software design and architecture, project management, software development process, and efficiency measurement of software products. Moreover, students will study essential techniques for inspecting, reviewing, and verifying the software and its process.

Computer Network (CN)

This track is the core track that students can learn the Internet architecture, Internet protocols, how the Internet works, network management, network programming, and computer forensic. In addition, a networking track could cover local wired and wireless IP network design, wide area network (WAN) connectivity, routing, and administration, and also mobile communications technologies.

Electronic Business Systems (EB)

This applied track focuses on applying various computing technologies for building e-business infrastructure and platforms in order to enhance opportunities for a number of traditional business applications. Students will study e-business modeling and related issue such as customer relationship management, supply chain management, and mobile applications. Student will also learn how to identify business problems and come up with solutions for solving these problems as well as creating new business strategies. Other topics such as decision support, business intelligent systems, and project management are also included in this track.

Multimedia Systems (MM)

This applied track focuses on creating and applying various multimedia technologies for the building of multimedia related systems including computer animation, computer graphics, and virtual reality. Student will learn how to manipulate various media including audio and video data so that they can apply multimedia technology to several fields such as art, education, entertainment, engineering, medicine and science.

Management Information Systems (MS)

This applied track's main feature is to manage how to use information technology (IT) and information system (IS) to support and improve the business processes of the organization. Management Information systems comprise of five main components: hardware, software, data/information for decision-making, procedures, and people (individuals, groups, or organizations). In order to support critical decision making in the management area of the organization, this track focuses more on the data interpretation because Information is fundamental to the validity of the decision that affects accomplishment of the tasks effectively and efficiently.

Health Information Technology (HT)

This applied track focuses on applying information technology for building health and healthcare applications in order to deliver the quality care. Students will study healthcare systems, clinical information systems, management information systems in healthcare organizations, e-Health and telehealth, as well as information privacy and security in healthcare. Other topics such as information models and healthcare information standards are also covered.

Senior Project

Every ICT student is required to submit and present a senior project to a designated committee. Students may elect to do work in one of the available major tracks or do interdisciplinary work. The senior project must be approved by the student's advisor and the Senior Project committee of the Faculty of ICT. In addition, the documentation of the project must be written in English and submitted by the end of the senior year.

Student Support Systems

Advisory Systems:

- Advisor [Aj.Baan]
- Staff of Academic Administration

  P' Kullaporn   E-mail : kullaporn.hon@mahidol.ac.th

  P' Noppawan   E-mail : noppawan.ral@mahidol.edu

Tutoring System

The tutoring system aims at improving students especially on the fundamental computer subjects through tutoring sessions. These tutoring sessions are designed to be small-group, interactive environment and focusing on only the core concepts of the subjects. Although, the courses are not compulsory, it is highly recommended for those who want to improve their grades and who are having difficulties in the normal classes.

These tutoring sessions are conducted by students (i.e. tutors) who have completed the subjects well and have shown their capabilities in transferring their knowledge to others. Each of these tutoring courses also requires a designated tutor course coordinator who will facilitate the course by means of organizing the tutoring schedule, serving as a contact point of the course, monitoring the course and reporting the feedbacks to the faculty.

All of the tutoring courses will be overseen by the tutoring system's management team who makes sure that the tutoring system, as a whole, runs smoothly. Moreover, the team also helps in coordinating with the lecturers of each subject so that the teaching contents during these tutoring sessions will truly serve their purposes.

ICT-Scholarship Program (For Thai Students Only)

The Faculty of ICT offers different types of scholarships for students who perform well academically as a reward for their hard-work and dedication to education. The Faculty of ICT awards many scholarships to students each year (approximately 10%).

4-Year Partial Scholarship:

- **Dean's Scholarship:** Students who perform exceptionally well in the ICT Admission Examination are eligible for this scholarship throughout the program as long as they maintain the minimum CGPA above 3.50.
- **Merit Scholarship:** Students who perform exceptionally well in the ICT Admission Examination are eligible for this scholarship throughout the program as long as they maintain the minimum CGPA above 3.25.

ICT Annual Scholarships: 3 Type

- Academic Excellence
- Activity Excellence
- Faculty Services Scholarship

Lab Assistant System

Lab activity can be considered as one of the most integral components of learning to make sure that students get hands-on experiences on the subject being taught. Lab assistant system aims to provide lab assistants with an appropriate set of competencies for the subjects being involved and also provide good and efficient lab facilities. The lab assistant system of the Faculty of ICT mainly provides 4 main components which include lab assistants, lab rooms, IT resources, and lab schedule for the whole semester. Not only students perform lab activities under guidance of the instructor, but also by the lab assistants which are experts in the subject.

The lab assistants are the technical staffs in the faculty who have been working in IT fields for many years. This is to make sure that every student in the lab is taken care and able to conduct the lab efficiently. The lab rooms, hardware, and software are allocated properly according to the lab purpose, and machine performances. Moreover, due to large amount of lab activities being performed at the same time, the lab assistant system also manages the schedule of lab usage during the whole semester.

Grading System and Policies

E ven though there is a general guideline for assigning a grade in accordance with a student's performance in a class, individual instructor may have his or her own judgment in deciding an appropriate grade for the course.

A grade of students is assigned according to individual performance in class and may vary from course to course. Workload in class may include quizzes, homework, term projects, class attendances, tests and exams. Any reproduction or plagiarism of other students' works is prohibited and will result in a severe penalty. A grade report will be sent to a student's email after the grades are given by the instructor. Student's achievement in a course is evaluated using letter grade symbols

Grade	Achievement	Grade Points
A	Excellent	4.0
B+	Very Good	3.5
B	Good	3.0
C+	Fairly Good	2.5
C	Fair	2.0
D+	Poor	1.5
D	Very Poor	1.0
F	Fail	0.0

Under some specific circumstances, one of the following letter grades, without credit points, may be assigned for a course.

I	Incomplete
X	No report yet received from the instructor
P	In progress
O	Outstanding
S	Satisfactory
U	Unsatisfactory
AU	Audit (No credit granted)
W	Withdrawal

The course assignment has to be completed to the satisfaction of the instructor. The student who did not attend the final examination due to one of the following reasons below must inform the ICT program as well as the instructor, and to provide any necessary documents in due time (as soon as possible – e.g. no more than a few days): an illness, of which a medical report issued by a doctor at Mahidol University Health Center or by a good reputation hospital must be presented; an emergency case with documented accidents; a severe illness in the immediate family. An **"I"** grade given to students must be reassigned to a new grade within one academic year. Otherwise, the grade will automatically change to an F.

Adding, Dropping and Withdrawing a Course

A dding or dropping courses is allowed in the first two week of a regular semester or in the first week of the summer session.

After that period, withdrawing a course is allowed until one week before the final exam week and the 'W' grade will be given for the course. Permission from both the instructor and the advisor must be obtained for all cases.

Re-taking and Re-grading a Course

A student need to retake a course if they received an **"F"** or **"W"** grade. Only two repetitions are allowed for retaking courses. If students received an F grade of the same course for three times, they are no longer eligible to study in the Bachelor of Science in ICT program. Students may regrade a course if they want to get a better grade. However, the new grade will replace the previous grade. In both cases, only the new grade will be used for computing the cumulative GPA and the previous credits will be discarded.

Student Status and Probation

A student's status is determined after the first two regular semesters.

A student is considered to be in a regular status when his/her cumulative GPA is 2.00 or higher.

A student whose cumulative GPA falls below 2.00 is in the probation status as follows:

High probation status: the cumulative GPA is 1.80 or higher

Low probation status: the cumulative GPA is 1.50 or higher, but less than 1.80.

Dismissal

Students who fall into one of the following categories will be dismissed from the ICT program.

Students with a cumulative GPA below 1.50.

Students with a cumulative GPA below 1.80 for two consecutive semesters.

Students with a cumulative GPA below 2.00 for four consecutive semesters.

Students who have repeatedly violated the university rules and regulations governing student conducts including:

Plagiarism of assignments

Cheating during examinations

Drug use

Damage to the university's properties or reputation

Gambling, stealing and other inappropriate behaviors

Honor Degrees

To recognize the outstanding achievements, students who maintain a high scholastic GPA are eligible for graduation with the following honors.

First Class Honor: Earn a cumulative GPA of 3.50 or higher.

Second Class Honor: Earn a cumulative GPA of 3.25 or higher, but less than 3.50.

Never receive an **"F"**, **"W"** or **"I"** grade for any course.

Never regrade any course.

Completed all the required courses within 4 years since initial registration.

Registration and Fee

Students are responsible for following up their own class registration. Registration periods are scheduled in advance and will be posted each semester. Except for the first semester of the first year, students are required to pay their tuition fees via the on-line e-payment system of Mahidol University. A student is officially registered and eligible to attend classes only when registration is completed with tuition fees paid or properly settled. Failure to pay tuition fees will result in the student's grades, records, and transcripts being withheld. Registration for a subsequent semester may not be permitted without proper financial settlement.

Mahidol University fees cover the usage of university facilities including sporting grounds, health service centers, library and learning resource centers, computing and Internet services, and student activity centers. In addition, students should prepare for additional expenses such as textbooks, studying materials, and personal expenses.

International Experience

Student Exchange Programs

Mahidol University is fully engaged in the drive for international education. Mahidol University has provided many scholarships for students to participate in international activities abroad including internship programs, student exchange programs and student workshops. Students from the Faculty of ICT have participated in several international activities in many countries including Japan, Germany, United Kingdom, Australia, Norway, China, Taiwan, Malaysia and Singapore. The experience that they gained are invaluable. The Faculty of ICT highly recommends to all students to seek international experience abroad. Mahidol University and the Faculty of ICT would like to ensure that all students have a chance to participate in such international activities. Please find more information about International opportunities in the website of the Faculty of ICT.

Academic Policies and Procedures

Student Attire

Students are required to wear proper university uniforms while attending all classes, taking exams, using university facilities and services. Failure to do so may result in some disciplinary actions taken by the ICT program.

Mahidol University uniform regularly used is shown below:

Female students are required to wear white short sleeve shirts with blue or black skirts in proper length with the university pin on the right side of the shirt.

Male students are required to wear either white short or long sleeve shirts with blue or black pants. No jeans are allowed.

Students must wear belts with the university belt buckles.

Student must keep their shirts tucked in and wear proper and comfortable shoes.

- For more information about student's uniform, please visit https://op.mahidol.ac.th/sa/

Students can buy brooch, leather or suede belt, belt buckle, bowtie, and necktie at The Harmony shop by Mahidol University which is located on the 1st floor of the Office of the President building and the 1st floor of Mahidol Learning Center.

Class Attendance

Students are expected to attend classes regularly and be on time. There will be a regular attendance checking for all classes. A total of 50% attendance is required to be eligible for the examination. If students can no longer attend a class or want to drop a class, they must submit a withdrawal or drop form at the ICT office. Otherwise, they will receive the grade F for the class.

Classroom Policies

Students are required to wear proper attires to attend classes. Students should let the instructor know beforehand if they have any valid reason to leave the class early or to come to class late. If students were absent from a class with valid reasons such as being sick or personal emergency, they should submit the leave/absent form at the ICT office. If it happens that the class had a quiz or test, it is up to the instructor's decision whether to give make-up test for students or not.

All mobile phones must be turned off during the class. Students are not allowed to have food or drinks in the classroom. Smoking is prohibited everywhere in the ICT building.

Examination Policies

Students need to be in proper uniform during exam days. Students must be on time for the exam. Students arriving late for more than 30 minutes after the exam starts, will not be allowed to take the exam.

Only students, who registered for the course, are allowed to take the exam. Students must present their student ID for identity checking during the exam. Students must sit in the assigned seats and sign their names for the exam attendance record.

During the exam, students are not allowed to temporarily leave the room except in emergency cases. Students are only allowed to leave the exam room one hour after the exam started. Both the exam paper and the answer sheet must be turned in before students leave the exam room. Only pens, pencils, rubbers and necessary stationery are allowed in the exam room. All personal belongings including electronic devices, mobile phones, dictionary, textbooks and notes must be kept in students' lockers unless the instructor for the class allows an open-book exam. The instructor must say specifically which items are allowed in the exam room.

If students failed to take the exam on the scheduled date without prior arrangement with the instructor or due to an emergency, such as serious illness or an accident, they will not be allowed to take make-up exam and will receive an F for the course.

Any form of cheating, including talking, whispering or signaling other students, looking at other students' exam papers, and bringing small notes for a closed book exam, will receive an automatic F grade for the course as the minimum penalty.

Academic Dishonesty and Punishment

Academic Dishonesty is strongly prohibited at Mahidol University. It is considered as a serious offense because it threatens the integrity of our university. Any dishonest act will result in some severe penalty such as termination of a scholarship as well as being suspended for one year. Academic dishonesty includes, but not limited to, the followings:

Cheating: Using unauthorized means to copy another person's work for academic assignments or during the exam, and submit work and claim a credit without one's own effort.

Fabrication: Making up data, information, procedures or research results.

Falsification: Altering information such as a grade, an exam paper, academic records, experimental results, or forging someone's identification, or intentionally citing a false source of information.

Multiple Submissions: Submitting full or partial portion of the same academic work for credit more than once.

Plagiarism: Reproducing work or idea of someone else as one's own in any academic exercise without a permission of the owner or without any acknowledgement to the source.

Complicity: Helping or attempting to commit an academically dishonest act.

Any form of academic dishonesty will lead to one or the combination of the following punishments:
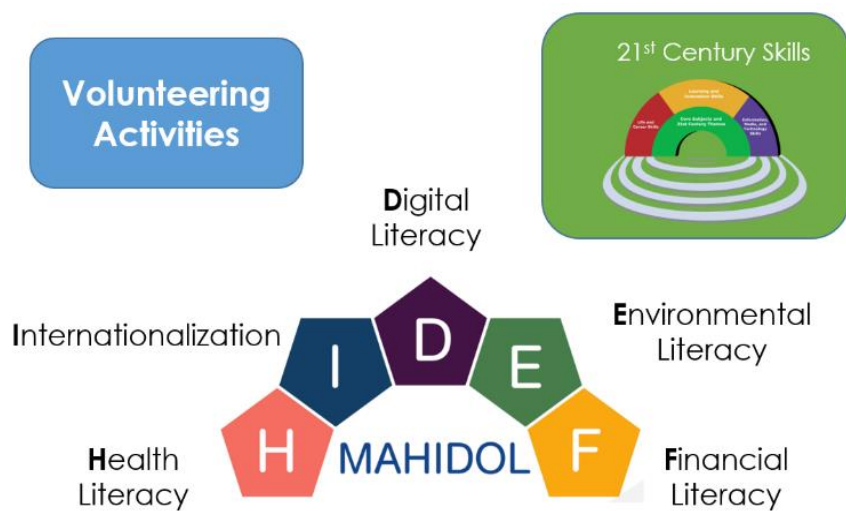

- 🎓 A zero point on the assignment or test.
- 🎓 An "F" grade.
- 🎓 No longer eligible to enroll in the Bachelor of Science in ICT program.
