Long-term Internship Senior Project

Long-term Internship Senior Project provides opportunities for 3rd year students who are interested in conducting their senior projects under supervision of both an ICT Mahidol instructor and advisors from leading IT companies in Thailand.

Through this program, the students will learn how to analyze and solve real problems in the digital industry.

The students who apply for this program will be assigned a project during their internship programs at companies (June - end of July), then continue such project to their senior projects during 1st and 2nd semester of their 4th year at the Faculty of ICT.

Periods of the Program

Period 1: **Internship at a company**

During summer break of the 3rd year
(Summer: June - July)

Period 2: **Senior Project**
at the Faculty of ICT

1st and 2nd semester of the 4th year

Overall Program

01 **Seek for an advisor (ICT Instructor) & the Area of interest**

Consult with your advisor and prepare your own topic.
Discuss such topic with the company
to see if there's any possibility to proceed further.

02 **June – July 2021: Do an internship at A-Host or MST**

Do an internship program at the chosen company during June – July 2021.
You will be assigned a project from the company. Such project will be further
conducted as your senior project.

03 **August 2021 – April 2022: Conduct a senior project**

Continue such project to your senior project during 1st and 2nd semester of the 4th year at the Faculty of ICT. The project will be co-supervised by the advisor from ICT Mahidol and your chosen company.
