### ICT Mahidol organized the “IoT Talks 2023: Unlock the IoT potential with OpenAI and ChatGPT”

On March 29, 2023 – the Faculty of Information and Communication Technology, Mahidol University (ICT Mahidol), organized the “IoT Talks 2023: Unlock the IoT potential with OpenAI and ChatGPT” in Room IT204, the Faculty of ICT, Mahidol University, Salaya, as well as online via Webex Meetings. On this occasion, Mr. Ome Sivadith, National Technology Officer, Microsoft (Thailand) Co., Ltd., was the guest speaker at the event and shared his knowledge about the usage and effectiveness of ChatGPT with all participants included instructors, students, staff, and others.

ChatGPT is a conversational model developed using Reinforcement Learning techniques, which is an AI for efficient conversation that can respond to various questions and help with writing letters, composing both Thai and English language, as well as assisting in writing and debugging codes.
