

## Seminar / Training News

ICT Mahidol organized the project, “Smart with ICT: Introduction to Basic Programming with C for Students, and Introduction to Basic Programming with Python for Students”

On March 4, 2023 – the Faculty of Information and Communication Technology, Mahidol University (ICT Mahidol), organized the project, “Smart with ICT” which includes 2 topics: “Introduction to Basic Programming with C for Students”, as well as “Introduction to Basic Programming with Python for Students”. The 2-round trainings were hosted by Dr. Tipajin Thaisutikul, Assistant Dean for Academic Services and Technology Transfer via Webex Meetings.

The morning session focused on C programming, while the afternoon session focused on Python programming. Each round had around 20 participants who were taught the basics of programming in their respective languages. They learned how to write code online, input/output of programs, coding principles and syntax, and alternative coding. They also had hands-on practice with basic programming using C/Python.
