ICT Mahidol organized a workshop on "SPSS Statistics for Data Analysis and Visualization"

During June 22 - 23, 2023 – the Faculty of Information and Communication Technology, Mahidol University (ICT Mahidol), organized a workshop on "SPSS Statistics for Data Analysis and Visualization". On this occasion, Miss Bang–Orn Kornwirat, Acting Head of Academic Services and Technology Transfer Division, served as the keynote speaker in Room MAI2, 1st floor, ICT Building, Salaya.

The objectives of the workshop were to enhance the skills of the participants and enable them to apply their knowledge of using SPSS software for data analysis and statistical data management efficiently. SPSS is a powerful, pre-built software program widely used for various types of data analysis and statistical data management. It allows users to perform statistical analysis, data management, and interpret the results in the form of tables or various types of charts. It is suitable for users who require accurate and efficient data processing.
