ICT Mahidol organized a hands-on training program titled “Docker and Kubernetes Essentials”

During June 29 - 30, 2023 – the Faculty of Information and Communication Technology, Mahidol University (ICT Mahidol), organized a hands-on training program titled “Docker and Kubernetes Essentials”. On this occasion, Dr. Ittipon Rassameeroj, Assistant Dean for Infrastructure and Technology, served as the speaker who provided knowledge about the practical usage of Docker and Kubernetes software to 30 participants. The training took place at a computer laboratory, 25th floor, MU building, the Faculty of ICT, Mahidol University.

The objective of the hands-on training program “Docker and Kubernetes Essentials” was to enable participants to understand the principles and important concepts of Container Technology through theory and practical exercises. This will allow the participants to apply Container Technology and Kubernetes to their own work tasks. Containers and Kubernetes are popular technologies that many organizations use to manage the environments between service and servers for users, ensuring reliable service delivery while reducing the workload for system administrators.
